## Uintah Machine Dump-bed Trailers

Uintah Machine manufactures hydraulically operated dump-bed trailers. The bins on these trailers are hydraulically tilted to dump the contents, such as trash or rock dust, out the back. The tail gate swings freely when the bin is tilted and can be locked during transportation. We will build yours with the hitch type that you require. The drawing below shows a one-axle model. We also build them with two axles and Uintah Machine's walking beam suspension which keeps four wheels on the ground at all times for a relatively smooth ride.

We take pride in our work. You can count on receiving the toughest, highest-quality, lowest-maintenance, dump-bed trailer around. Our customers have always been happy with our quality.

Uintah is happy to design and build a dump-bed trailer to meet your specific needs. Contact us for a free quotation.

Our expertise is not limited to trailers alone. Visit our Web site at [www.uintahmachine.com](http://www.uintahmachine.com) for more information about our mining equipment and services.
